The evaluation will not be displayed due to low response rate.

**Concluding Comments** 

Provide any additional feedback relevant to this course and/or instructor.

This course was fun to be part of. The information covered was interesting and explained well. It is also very convenient that the lecture notes are posted to moodle, and additional information is occasionally added to the notes after class. Dr. Koytcheff is great at explaining concepts without making it too difficult to understand. The homeworks were also a good test of how well you knew the information, and the hints were quite helpful on certain problems.

The only criticism I have for the class isn't for the professor or class itself, but for how the homework was graded. I would like to see the grader give more information as to why points are deducted (and to include the total points per problem so you know how much you missed). For example, I got a 4/6 on one problem and originally thought I got a 100% since nothing was written for the question. There were 2 random underlines, but I assumed parts were underlined while grading to make sure that I included all necessary parts since I couldn't find anything wrong with my answer. Looking back, there are a couple of problems I got points off on that only include 1-2 underlines with no explanation (or problems that just included a ?)

#### Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- Dr. Koytcheff is a great teacher. However, I believed many of the lessons he taught were extremely wordy in how they were taught, making the lessons hard to understand sometimes. I often had to teach myself a few of the important concepts, but he laid a strong groundwork for me to do so. I would recommend him to others taking this course.
- Dr. Koytcheff is an awesome professor. Very helpful and chill, never got upset or lost his cool. Would definitely take his course again. He is a great teacher.
- Make sure you show up for class everyday, or you will not show do great in this course. The class is kind of challenging, but he teaches you what you need to know.
- confusing, hard to follow in class but helpful if help is requested
- good professor, really wants his students to do well. Always there to help or answer questions.

- WILEY
- Wiley

**Concluding Comments** 

Provide any additional feedback relevant to this course and/or instructor.

- Class was challenging, but Dr. Koytcheff was very good at explaining every lesson in detail.
- DEFINATELY A CLASS YOU NEED TO GO TO EVERYDAY AND PAY CLOSE ATTENTION.
- Professor struggled with answering questions and simplifying the subject for it to be easier to understand. A lot of wiley plus homework that was very difficult to complete and sometimes covered things we didn't go over. Textbook doesn't do a good job of explaining it either, had to YouTube alot of videos on how to figure it out.
- The course was difficult, as most maths are. The professor is great but explains things poorly. It is very obvious he is very intelligent and on an entirely different level of thinking, and is unable to dumb down the required material for easier understanding. Overall, good course, just very difficult.

The evaluation will not be displayed due to low response rate.

List other platforms and technologies used in this course.

The evaluation will not be displayed due to low response rate.

Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- One of the best instructors I have had while in graduate school. The course material was hard, but that is to be expected. I really enjoyed the course and the instructor.
- Robin is a good instructor but the subject is incredibly difficult. I can only assume he did his best to communicate it.

**Concluding Comments** 

Provide any additional feedback relevant to this course and/or instructor.

The course is just inherently difficult. Kudos to Robin for trying to make it feel a little easier but Algebraic Topology is HARD.

Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- Dr. Robin is a model professor! He is passionate about his field and truly wants the students to learn the material. The lectures were very engaging and I found the course material to be super interesting (and useful!). This class was such a welcomed change of pace from the other computation-heavy math courses I have taken such as Calculus1-3/DE, and Dr. Robin went the extra mile every day to ensure the students had a positive learning experience!
- Not normally too interested in the topics I'm learning in math classes, but this class was a new experience for me. I found myself actually liking the topics we discussed in class! The only downside I could point out was that I found the grading of the homework assignments (by the grader) a bit harsh, and it being due almost every week was a little exhausting at times. Overall though I really enjoyed the course/ teaching style and I think the math dept should continue offering it! Thanks for a great semester!!
- This course covered many different interesting topics and problems that arrive in graph theory and gave a good overview of what the subject has to offer. The professor did a great job covering the material and even going out of their way to be as helpful as possible to students by doing this such as uploading notes, adding additional comments or examples to notes outside of class, or adding extra asides or optional material into notes.
- You have a tendency to get a bit sidetracked when answering questions. You do give very thorough, well thought-out answers, but it can take up a bit of class time.

Concluding Comments

# Thank you for your feedback!

If you have any questions about this survey, please contact the Office of Faculty Affairs at course.evaluations@louisiana.edu

About the **INSTRUCTIONAL ACTIVITIES** usefulness:

Please list any other instructional activities used in this course. Indicate each activity as: Very Useful, Somewhat Useful, or Not Useful.

The evaluation will not be displayed due to low response rate.

About the **INSTRUCTIONAL RESOURCES** usefulness:

Please list any other **instructional resources** used in this course. Indicate each resource as: Very Useful, Somewhat Useful, or Not Useful.

The evaluation will not be displayed due to low response rate.

List other platforms and technologies used in this course.

The evaluation will not be displayed due to low response rate.

Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- Dr. Koytcheff is an excellent instructor!
- Dr. Koytcheff is organized and tries his best to explain the contents. He is reasonable and always willing to help students.
- I liked that the notes were posted to Moodle!
- Teaching method was excellent. Thank you Dr. Koytcheff.
- The professor was super organized and was great at giving assignment/test feedback which really helped me stay focused and on track. The homework did get pretty challenging at some times though and it did feel like the homework/test content was not matching with the level of things being presented in the lectures. Maybe more examples in class would have helped. Overall enjoyed the class!
- This review was written before any presentations happened.

Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- My one big issue with the course was the layout of tests and homework. I feel as though the shortend semester is probably to blame but the time we had to do the first 2 assignments were significantly longer for the last 3 and having all the tests take place in the 2nd half of the semester was odd considering the pace of the course
- Well thought out course, lovely material, excellent instructor. Great enough that there really isn't much elaboration required.

The evaluation will not be displayed due to low response rate.

What were the most effective and least effective remote learning and communication methods used in this course?

The evaluation will not be displayed due to low response rate.

Concluding Comments

Provide any additional feedback relevant to this course and/or instructor.

- Dr. Koytcheff is the best professor in the department in my opinion. I hope to take several more courses with him in the future. He is very kind and understanding, and does his best to accommodate all of his students. He explains things very well and in depth, and tries to make connections to other subjects and explain things in different ways to help everyone understand. I always left his office hours with much more knowledge than I came in with. He never makes anyone feel dumb for asking questions and really wants his class to learn above all else. Dr. Koytcheff truly loves math and it shows when he lectures.
- The only issue I have is that lectures relied to much on students answering a question sometime no one would answer because we were all confused and waiting for someone to just guess something wouldn't help as much as going over the question itself.
- Very excellent. He made people think about the problems, and he was very helpful.

#### Thinking about the overall course MATH302-004-202020, please complete the following questions.

Please provide any comments about the course in the space below, including ways to improve instruction.

- The course went well with statics and gave more of a look at vectors, i feel the scope of this course was good.
- the only thing that I would tweak about the course is for student to be able to drop their lowest test grade, or for their final score to replace their lowest test grade

Thinking about the **instructor Robin M Koytcheff**, please complete the following questions.

#### Please provide any comments about the instructor in the space below, including ways to improve instruction.

- Dr. Robin is a great guy who clearly has a love for Mathematics. He really enjoys when students are asking questions and are engaged with what is going on. He does a great job of making test questions very clear and short enough to be completed within the time given, and the level of difficulty is perfect for testing us on the course material.
- I really liked how you went through the material. You spent time reviewing the concepts and backed it up with simple examples that helped push the point of it. I like hearing the proofs and theory as well as seeing it applied so the way you taught worked very well for me and i feel like the harder problems for homework helped me think about applying the concepts. Overall i enjoyed the class and felt eager to continue learning throughout the semester.
- I think Prof. Koytcheff has an amazing passion for teaching us and it shows in his instruction every day! Keep doing what you do but maybe write just a little bit bigger for the people in the back!
- Makes fair tests and hears the students opinions for dates and homeworks. He seems to know what he's talking about with the math and answers questions efficiently and well.

Please rate the usefulness in this course of the following instructional activities

Please list any other instructional activities used in this course. Indicate each instructional activity as: Very Useful, Somewhat Useful, or Not Useful.

wiley plus: very useful

Please rate the usefulness in this course of the following activities and resources.

Please list any other activities and resources used in this course. Indicate each as: Very Useful, Somewhat Useful, or Not Useful.

The evaluation will not be displayed due to low response rate.

## FA18 - Student Evaluation of Instruction Results

MATH635-001-201920

Dear Robin M Koytcheff:

The attached report contains SEI results for MATH635-001-201920

The evaluation and results are divided into the following question groups:

- The evaluation and results are divided into the following question groups.
  The student reported demographic information
  "Thinking about the overall course listed above, please complete the following questions:"
  "Thinking about the instructor listed above, please complete the following questions:"
  "Please rate the usefulness in this course the following instructional activities."

- "Please rate the usefulness in this course the following activities and resources."
- The Profile displays the responses to this survey in a graphical presentation.

- A compiled list of all open-ended comments submitted for this course.

For each question, the number of students(n) who responded, the average or mean(av), the median(md), and standard deviation(dev) are displayed. If you have any questions, please contact Debra Broussard at assessment@louisiana.edu or 482-6974.

Sincerely,

Office of Institutional Assessment assessment@louisiana.edu

#### Thinking about the overall course MATH250-005-201920, please complete the following questions.

Please provide any comments about the course in the space below, including ways to improve instruction.

- Great course. I feel like Wiley makes the course some what difficult because it requires the user to use specific symbols (e.g. parentheses) in certain ways, which makes it not user friendly.
- Having homework pertaining to the lesson is fine but sometimes the WileyPlus problem due dates are hard to keep up with especially if it is a difficult topic. Many questions of math 250 for WileyPlus is hard to answer since it is all estimation and more difficult than what was taught in the classroom. Also, it'd be great if the professor taught us everything we would need to know and have enough practice with questions similar to the test since WileyPlus questions tend not to be relevant to the test, and again, much more difficult since it is not taught in class in ways where we could figure it out.
- Not so many deadlines on wiley plus, hard to keep up with

Thinking about the **instructor Robin M Koytcheff**, please complete the following questions.

#### Please provide any comments about the instructor in the space below, including ways to improve instruction.

- He was a wonderful and enthusiastic instructor. I appreciate how easy it was to understand him and willing he was to help me understand, which allowed me to succeed.
- Mr Koytcheff is a wonderful instructor. He is able to teach a challenging topic by breaking the subject matter down in easy to understand demonstrations. I dropped two other teachers before settling with him, and I am so grateful he is at UL because of that.
- The professor was very willing to help and was very understanding, which I truly appreciate. Another thing I appreciate is the sample tests. It is great that I could see the solutions as well to study. I feel like that was crucial for me to pass the tests with good grades since I understand what the professor asks for in a question and how to answer them properly.

As for the homework, it'd be great if the due date was pushed back to Saturday instead of Friday since there are many students who have work and are unable to make time for it.

teaches too fast

Please rate the usefulness in this course of the following instructional activities.

Please list any other instructional activities used in this course. Indicate each instructional activity as: Very Useful, Somewhat Useful, or Not Useful.

The evaluation will not be displayed due to low response rate.

■ WileyPlus is the horrible for students.

### SP18 - Student Evaluation of Instruction Results

MATH536-001-201840

Dear Robin M Koytcheff:

The attached report contains SEI results for: MATH536-001-201840

The evaluation and results are divided into the following question groups:

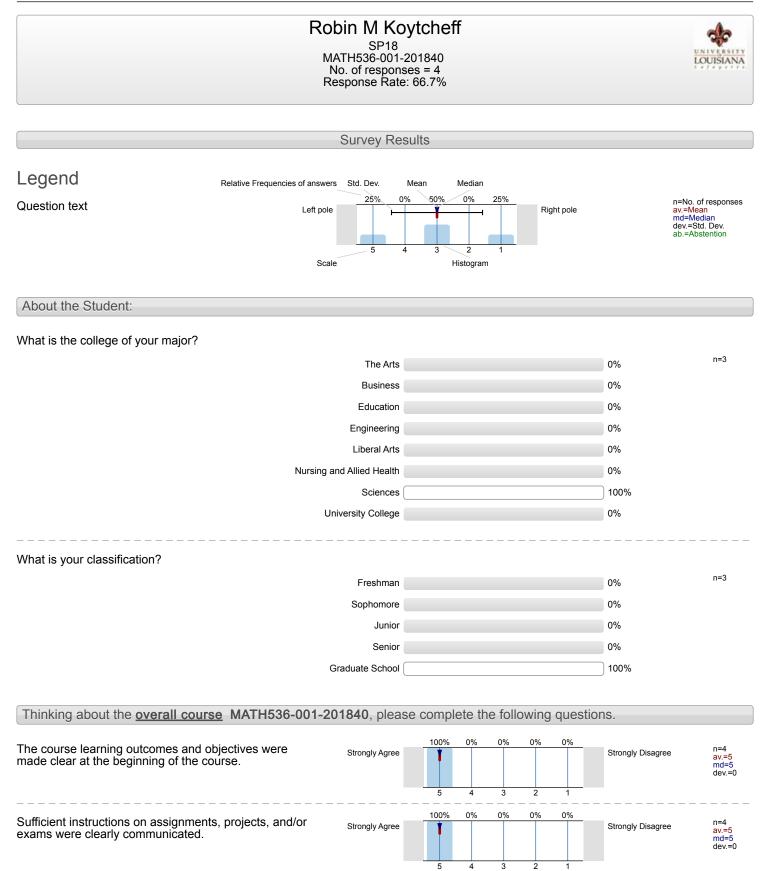

- Student reported demographic information
- "Thinking about the overall course listed above, please complete the following questions:"
  "Thinking about the instructor listed above, please complete the following questions:"
  "Please rate the usefulness in this course the following instructional activities."

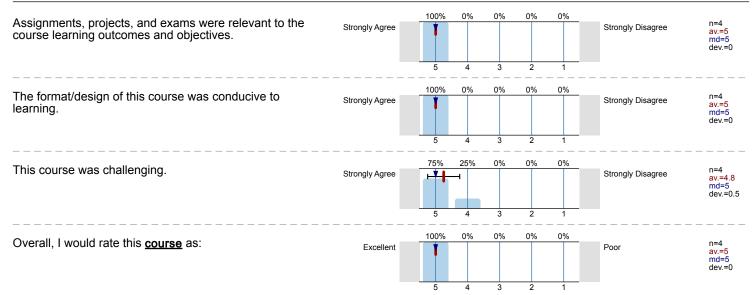

- "Please rate the usefulness in this course the following activities and resources."
- The Profile displays the responses of this survey in a graphical presentation.
- A compiled list of all open-ended comments submitted for this course.

For each question, the number of students(n) who responded, the average or mean(av), the median(md), and standard deviation(dev) are displayed. If you have any questions, please contact Melissa Lewis at courseevaluation@louisiana.edu or 482-6974.

Sincerely,

Office of Institutional Assessment courseevaluation@louisiana.edu

Thinking about the overall course MATH250-011, please complete the following questions.

Please provide any comments about the course in the space below, including ways to improve instruction.

- Basic college level math class. Nothing more; nothing less.
- Excellent
- It is a very hard course
- no comments

Thinking about the instructor Robin M Koytcheff, please complete the following questions.

#### Please provide any comments about the instructor in the space below, including ways to improve instruction.

- Amazing teacher. Willing to go above and beyond to make sure you understand what he is teaching. Would highly recommend to any student,
- Dr. Koytcheff is a good teacher, even if a little bit awkward at first. You warm up to him as he warms up to you. You can tell that he is very passionate about math and enjoys when students are as well, though such students are few and far between in a business-oriented applied calculus class. He communicated very clearly with the class and was open to student suggestions. My only complaint was the complaint that actually encouraged me to withdraw from the class. The homework as well as the examples given in class were much easier than what appeared on the exam, and as a result, I felt falsely confident in my abilities come test day. I went into the exam thinking I was going to ace it, and then I left knowing that I flunked it. My only suggestion to Dr. Koytcheff in regards to future instruction is to spend less time explaining simple concepts and more time explaining challenging ones.
- Excellent
- Great teacher, too smart to be teaching survey calc
- I'm assuming because he was new he has not found a good flow yet. His teaching style has no structure and was very unsure how to go about teaching us or give material. We basically had to suggest based off past experiences.
- Kind, smart, always willing to help
- One of the most organized and helpful professors I've ever had. He was always willing to go the extra mile to get to campus and meet with students on difficult topics, and calculus wasnt that easy.
