

# GeauxGuest Logon Instructions

---

UL Lafayette **Device Registration**

Please complete the form below to gain access to the network.

If you are a faculty, staff, or student of UL, do **NOT** use this form; use this [link](#)

Your Name:

Please enter your full name.

Phone Number:

Please enter your contact phone number.

Mobile Carrier:

AT&T Wireless ▼

The visitor's mobile carrier.

Email Address:

Please enter your email address.  
This will become your username to log into the network.

Confirm:

I accept the [terms of use](#)

**Register**

Already have an account? [Sign In](#)

1. Using your wireless device, find and connect to the **GeauxGuest** SSID.
2. If a browser window does not open immediately to take you to the captive portal, open a browser window and type **geauxguest.louisiana.edu** in the address bar.
3. Enter your name, phone number, mobile carrier, and email address into the boxes provided. These will be used to send a single-use code to you to complete your registration. Please read the Terms of Use, and accept by marking the checkbox.
4. A confirmation page will open, showing you the information you entered. You should shortly receive an email and/or text message with the Username and Password that you will use to connect to **GeauxGuest**. Please make note of them, and press the 'Login with a Guest Account' button.
5. Enter the Username and Password that was sent to you via email and/or text message. Press the 'Login' button to complete the sign-in process.
6. After a short wait, your browser should open the main campus webpage, **www.louisiana.edu**. You've successfully connected to **GeauxGuest**.
7. If needed, please reboot your device to complete registration.
8. If Apple devices have difficulty connecting, please refer to additional instructions on page 3

If you have any difficulty connecting to **GeauxGuest**, please contact the IT Service desk by phone at (337) 482-HELP, by email at [ithelp@louisiana.edu](mailto:ithelp@louisiana.edu), or in person at Stephens Hall, room 110.

If unable to login, type the following in your address bar:

# Please set your MAC Address to TURN OFF Private Address for GeauxGuest:

## How to use a private Wi-Fi MAC address on iPhone and iPad in iOS 14

1. On your iPhone or iPad, open the **Settings app**
2. Tap **Wi-Fi**
3. Tap the blue "i" next to a network (one you're already connected to or not)
4. Tap the toggle next to **Private Address** to mask your iPhone or iPad's Wi-Fi MAC address
5. If you're switching this on while already connected to a network, tap **Disconnect** to finish the process (you'll automatically reconnect to the Wi-Fi network in a moment)

Here's how these steps look:

That's it! You should now see the new private address in place of your iPhone or iPad's actual Wi-Fi MAC address. Remember using a private Wi-Fi address works on a per network basis, so repeat as needed.
