Table of Contents

Chapter 1

Introduction	1
1.1 Basic ideas	1
1.2 Some examples	6
1.3 Exercises	12

Chapter 2

Descriptive Statistics I: Tabular and Graphical Summary	13
2.1 Generalities	13
2.2 Describing qualitative data	14
2.3 Describing discrete quantitative data	20
2.4 Describing continuous quantitative data	28
2.5 Summary	33
2.6 Exercises	34

Chapter 3

Descriptive Statistics II: Numerical Summary Values	35
3.1 Numerical summary values for quantitative data	35
3.2 Modified box plots	53
3.3 Numerical measures of relative position	54
3.4 Summary	59
3.5 Exercises	61

Chapter 4

Sampling and Experimentation	63
4.1 Introduction	63
4.2 Sampling	63
4.3 Experimentation	70
4.4 Summary	74

Chapter 5

Inference for a Proportion	77
5.1 Introduction	77
5.2 Estimating a proportion	78
5.3 Testing for a proportion	94
5.4 Directional confidence bounds	108
5.5 Summary	109
5.6 Exercises	111

Chapter 6	
Comparing Two Proportions	113
6.1 Introduction	113
6.2 Estimation for two proportions (independent samples)	113
6.3 Testing hypotheses about two proportions (independent samples)	122
6.4 Inference for two proportions (paired samples)	129
6.5 Summary	134
6.6 Exercises	137
Chapter 7	
Inference for a Mean or Median	139
7.1 Introduction	139
7.2 Inference for a population mean	140
7.2a Introduction	140
7.2b The normal distribution	143
7.2c Sampling from a normal population	148
7.2d Estimating a normal population mean	154
7.2e Tests of hypotheses about a normal population mean	163
7.3 Inference for a population median	174
7.4 Summary	179
7.5 Exercises	180
Chapter 8	
Comparing Two Means	183
8.1 Introduction	183
8.2 Comparing the means of two normal populations	184
8.2a Inference when the two population standard deviations are equal	186
8.2b Inference when the two population standard deviations are not equal	204
8.3 Inference based on ranks	205
8.4 Summary	213
Chapter 9	
Descriptive Statistics for Bivariate Data	215
9.1 Introduction	215
9.2 Association and Correlation	216
9.3 Regression	225
Chapter 10	
Inference for Bivariate Data	243
10.1 Inference for Regression	243

Chapter 11	
Chi-square Tests	259
11.1 Introduction	259
11.2 Chi-square Tests for Goodness of Fit	260
11.3 Chi-square Tests for Homogeneity	268
11.4 Chi-square Tests for Independence	273
Chapter 12	
Comparing Two or More Means	277
12.1 Introduction	277
12.2 Comparing the means of k normal populations	278
12.2a Assumptions, notation, and the overall F-test	278
12.2b F-tests for comparing nested models	283
12.2c Confidence intervals for linear combinations of means	290
Chapter 4a	
Probability Models (optional)	297
4a.1 Introduction	297
4a.2 Probability models for a variable with a finite number of values	297
4a.3 Probability models for discrete quantitative variables	300
4a.4 Probability models for counts	302
4a.5 Probability models for continuous quantitative variables	311
List of Examples	319
Index	321
